

**Cumberland Pediatric Foundation
presents a CME Live Dinner**

Pharmacogenetic Testing and Behavioral Health Medication Management

Co-sponsored by:

Vanderbilt Health
Affiliated Network

**NOV
18**

6:00 pm-8:00 pm

Learning Objectives:

- Define what pharmacogenomic testing is
- Review principles of pharmacology and how they form the basis of testing
- Use these principles to guide interpretation of results
- Appraise the evidence for pharmacogenomic-guided prescribing, and when it may change outcomes
- Explain ways a primary care pediatrician might incorporate pharmacogenomic testing into their practice

Michael Levin, MD

Assistant Professor

Clinical Psychiatry and Behavioral Sciences
Division of Child and Adolescent Psychiatry

Location: Harper's Steakhouse
2 Lea Ave. Nashville 37210

Please RSVP by: November 11
to: allie.haynes@vumc.org

This CME brought to you by the Cumberland Pediatric Foundation in collaboration with Vanderbilt Health Affiliated Network in an effort to achieve the education goals of its members.
